

Euripides interest in the psychology and social position of women is well known. Of the great Greek playwrights, he most directly reflects contemporary philosophical and social debates, and his work is of great value as a source for social history. The important new studies in this volume explore Euripides treatment of sexuality and Greek ideals of womens behaviour. Using a wide range of analytic techniques, seven scholars direct new light not only on Euripides own views of women but also on the ideals and preoccupations of his contemporaries in this area. Athenian women of the classical period were used, in Platos phrase, to a life in the shadows. This book helps us to see how far the influence of these cloistered women extended into the sunlit world of men.
