

In 1984, legal theorist and social activist Steve Bachmann wrote an article titled "Lawyers, Law and Social Change" for the New York University Review of Law and Social Change. Widely read for years by activists, cited in journals, and assigned in law school classrooms, in 2001 it became the title essay of a book-length collection of Bachmann's work released by Unlimited Publishing LLC. The 2001 edition of Bachmann's book ended with a grim assessment: "It does seem clear that if a mobilization of people is going to occur, it will not happen without organizing. And the problem with the years since 1984 is that it seems that outside some exceptions, most of the organizing has been done by the Right." As Bachmann predicted, the Right proceeded to pull the US into military misadventure, international disgrace, economic collapse, degenerating infrastructure, and an increasingly plutocratic social structure. In 2010, the New York University Review of Law and Social Change asked Bachmann to address these issues at the observance of its 40th anniversary. In conjunction with his keynote, NYURLSC also published a new article by Bachmann, discussing the progress or regression which had occurred since 1984. This provocative new edition from UP and Harvardwood Publishing combines Bachmann's original book with his 2010 update about remarkable developments in the political realm that followed. It also reveals some of the missteps that crippled a once growing movement toward social and economic justice in America. You don't need to be a lawyer to benefit from reading this book. Anyone who cares about jobs with fair wages, decent housing, affordable health care, meaningful education, and a just society will gain from the read. The American social contract of the 20th century is spiraling the proverbial drain in today's increasingly polarized political climate. The stakes are enormous for working people. If you are among the 99% who work for a living wage and want the same for your children, this book is for you.
